EXPERIENCE

Bharat Fincare

May 2025 – Present

Data and AI Engineer

Delhi

- Built **CreditDesk**, the data and AI platform behind **Rs 150+ Cr of small-ticket lending** (60k+ loans, ~30k customers, 10 lending products), covering ingestion, credit scoring, and an AI assistant for Credit Managers.
- Replaced manual pulls from 10 CRM portals with an automated **Delta medallion pipeline on Databricks** (Unity Catalog, Workflows): authenticated Python extraction, schema-drift guards, row-level quarantine with reject-reason capture, and job-failure alerting, distilling **~35 GB/year of raw snapshots into a ~100 MB validated store**.
- Gave credit teams instant repeat-customer risk signals via **parameter-based behavior scoring** (on-time ratio, bounce count, repayment delay, loan vintage; income-bracket weights, versioned formulas) with **append-on-change score history** in a PostgreSQL serving layer (fact/dimension model), powering FOIR-based affordability checks.
- Automated income verification from bank statements with an **RBI Account Aggregator module** (FastAPI + PostgreSQL, no cloud dependency): full consent lifecycle, encrypted FI fetch via the Finsense AA API, XML-to-JSON parsing, and a rule-based analyzer for **salary detection, EMI identification, and NACH bounce classification**; deployed for multiple NBFC brands from one codebase.
- Cut customer lookups from multi-portal digging to seconds with a **multi-agent NL2SQL assistant on Azure AI Foundry**; CMs/RMs ask in natural language, backed by an intent router, **pgvector few-shot retrieval**, deterministic SQL auditing (sqlglot allowlist, read-only role), grounded answers, and full audit logging.

Freelancing

Nov 2024 – Mar 2025

Software Developer

Gurgaon (Remote)

- Redesigned a CSR organization's website (HTML, CSS, JavaScript) and handled data processing and reporting for its campaigns; supported the team in securing a Google Ad Grant, working with business development and SEO specialists.

Mandelbulb Technologies

July 2023 – Sept 2024

Data Engineer

Jaipur, Rajasthan

- Developed end-to-end data pipelines using **Azure Data Factory and Databricks**, improving query performance and data quality; integrated AI solutions with **open-source LLMs and OpenAI**.

PROJECTS

Real-Time Fleet Telemetry Pipeline | *Azure Event Hubs, ADF, Spark, Azure SQL, Power BI*

- Built a streaming pipeline for IoT vehicle telemetry via **Azure Event Hubs**, orchestrating **Spark** transformations through ADF into dimensional data marts on Azure SQL; tuned stored procedures and caching for near-real-time **Power BI** dashboards used in fleet cost decisions.

Enterprise RAG Assistant | *Azure OpenAI, Microsoft Fabric, KQL, CI/CD*

- Engineered the retrieval layer for a RAG assistant on **Azure OpenAI**: enterprise data in Fabric OneLake, KQL lookups in ~0.1s, end-to-end responses in 1–2s; owned CI/CD on Azure App Service for same-day iteration on retrieval logic and prompts.

Credit Bureau Data Caching Platform | *Python, PostgreSQL, AWS S3*

- Designed a **cache-first architecture** checking an internal store before every paid credit bureau API call, eliminating duplicate pulls and cutting third-party spend; automated parsing of bureau records (PAN, score, tradelines) into PostgreSQL with S3 backup.

CERTIFICATIONS

Microsoft Certified: Fabric Analytics Engineer Associate (DP-600) | Agentic AI (DeepLearning.AI)

EDUCATION

Vivekananda Global University, Jaipur

Bachelor of Technology in Artificial Intelligence, CGPA 8.0/10

Jaipur, Rajasthan

Birla School, Pilani

Class XII, 8.0 CGPA

Pilani, Rajasthan

TECHNICAL SKILLS

Programming: Python, SQL, KQL, Bash

Data Engineering: Databricks (Workflows, Unity Catalog, Delta Lake), PySpark, Medallion Architecture, Azure Data Factory, ETL/ELT, Data Modeling (fact/dimension, SCD)

Databases & Storage: PostgreSQL, ADLS Gen2, Azure Blob Storage, Delta/Parquet, AWS S3

AI / Machine Learning: Azure AI Foundry, Azure OpenAI, Multi-Agent Systems, NL2SQL with guardrails, RAG, Embeddings & Vector Search, Prompt Engineering, LangChain, CrewAI, Scikit-learn, Pandas, NumPy

Cloud & DevOps: Microsoft Azure (Key Vault, App Service, Fabric), AWS S3, Git, Azure DevOps, CI/CD, Linux

Visualization: Power BI
